

How it works

Whether you're at home or outdoors and need help, simply press the SOS button.

It then sends up to 6 help texts with your GPS location & then calls those people consecutively.

When one of your emergency contacts answers you can talk to them through your pendant.

The LiveLife Mobile Personal Alarm.

Finally an SOS alarm that works anywhere.

Perfect for people at risk of falls
Texts up to 6 emergency contacts with your GPS location and then calls them. Can also call 000.

LiveLife 4G^x Mobile Alarm.

Fall detect, hands free voice & GPS. Works anywhere.

With the **LiveLife** 4Gx Mobile Alarm you can go anywhere knowing help is just a press of a button away. It is perfect for people who want to feel safe everywhere, not just at home.

It is a stylish pendant that works on the Telstra Mobile network. The wearer doesn't need a landline, mobile phone, wifi, NBN or internet.

When activated, the pendant sends up to 6 *help* messages using Bluetooth and GPS via text with a link to **Google Maps** showing the wearer's location to within 2 metres! The smart voice announcements guide you through your emergency.

It then starts calling up to 6 emergency contacts one after the other using the Telstra Mobile Network. You can even include '000' as a contact!

Intelligent charging station

**NEW
2021
MODEL**

When one of the emergency contacts answers, the wearer is able to talk hands free through the showerproof pendant. Anyone who knows the mobile number of the alarm can call it and it answers in speaker-phone mode hands free and automatically.

You can easily locate the pendant via text. It will send you the location on Google Maps.

Perfect for people who are at risk of falls.

Includes an automatic **fall detection** capability designed to activate for more serious falls likely to result in unconsciousness. It sends a *fall* text with the location and calls all contacts.

No monthly monitoring fees ever.

In an emergency it contacts family and friends or 000, not a stranger in a call centre who will likely just call your family or 000 anyway.

Ready to use right out of the box. No setup needed.

It has its own SIM card installed and mobile number. It comes all setup, ready to wear with the first year of unlimited emergency calls and texts included, a 12 month warranty, lifetime support and a 14 day moneyback guarantee.

Small, lightweight and comfortable to wear.

The **LiveLife** Alarm pendant weighs the same as 4 twenty cent pieces. It has a soft, non-slip surface and comes with an intelligent Bluetooth charging station, 'safety' lanyard, belt clip and a watch-style wristband.

Being water resistant you can wear it in the shower or even a tropical downpour!

The pendant fully recharges in the charging station in 20 minutes. The battery lasts up to 7 days.

The wearer can also call one of the emergency contacts at any time if they wish to.

Scored highest in CHOICE tests for personal alarms.
